## Reference letter

### (About rendering services in engineering maintenance)

“TethysAralGas” company is the subsoil user with Akkulka & Kulbas fields in Shalkar region, Aktobe state, Republic of Kazakhstan. The strong aspect of the company consists in occupation of a dominating position in insufficiently mastered areas with a high search growth potential, where the company can provide the considerable presence.

One of our contractors is “OMAC Integrated” Kazakhstan Service Company. This company specializes on granting all services complex in drilling mud properties and engineering maintenance, with “OMAC Integrated” we cooperate 5 years, together with this company was drilled more than 10 wells with 4000 meters target depth. In drilling process was various geological complications, which as decided them. One of successful decision was introduction and application by the “OMAC Integrated” company of “CLA-STAB” system, which showed the best results connected with stability of a hole well and reduction of terms wells construction.

In cooperation time was noted a high level of responsibility and vast professionalism. All works executed quickly, despite difficulties. So, please be informed, all delivered chemical reagents meet specifications and delivered in the specified time. And please be informed about wide experience and employee’s professionals, I recommend “OMAC Integrated” company as checked and reliable business partner.

Thanks and Regard's
